EXAMINER

CHAVIS, JOHN Q

ART UNIT

PAPER NUMBER

2193

MAIL DATE

DELIVERY MODE

11/16/2007

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/808,674	KREBS, ANDREAS S.	
	Examiner	Art Unit	
	John Chavis	2193	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-33 is/are pending in the application.
- 4a) Of the above claim(s) 21-33 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,8-12 and 18-20 is/are rejected.
- 7) ☒ Claim(s) 3-7 and 13-17 is/are objected to.
- 8) ☒ Claim(s) 21-33 are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 March 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Election/Restrictions

1. Claims 21-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species which is classified in class/subclass 715/731, there being no allowable generic or linking claim. Election was made on 11/1/07 via the Interview Summary attached.

The applicant elected claims 1-20, which are classified in class/subclass (717/153) over claims 21-33, which are classified in class/subclass (715/731).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 8, 18 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear in claims 8 and 18 whether the claims dependency detecting step is intended to be automatic as specified in each of claims 1 and 11 or manual as specified in claims 8 and 18, respectively.

In reference to claim 20, the applicant claims an apparatus dependent on the method of claim 1. However, It appears to have been intended to be dependent on claim 11 and may just be a typographical error; however, if the claim is intended to be dependent on claim 1, then, it should be written in an independent form and should include **hardware** components that implements the features of an apparatus.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. The claimed invention is directed to non-statutory subject matter. Claims 11-20 claim an apparatus; however, nothing in the claims appear to reference features of an apparatus (hardware). Each of the features appear to be merely software components and therefore are not considered statutory since they do not represent a process (method), a machine (hardware), a manufacture (product) or a composition of matter.

Specification

6. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

Abstract

7. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

8. The abstract of the disclosure is objected to because it is too long; since, it is longer than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 1-2, 8-12, and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over George (7,143,108) in view of Wallman (6,820,101).

Claims

1. A method for optimizing dependencies for a set of objects comprising:

George/Wallman

Both references are considered to optimize dependencies. George does not specifically state the feature; however, his figures 9 and 10 are considered to provide for the feature by determining dependencies between objects and determining which objects to delete based on dependency information, see also col. 1 line 57-col. 2 line 6. The feature is specifically stated in Wallman's system to enable deletion of objects that are no longer referenced, see fig. 2. Therefore, although the feature is not specifically mentioned in George's system, it would have been obvious to a person having ordinary skill in the art at the time of the invention to utilize the optimization specifically referenced and taught in Wallman's system for the same reasons it is utilized by Wallman, to

optimize memory that is no longer referenced, see Wallman's abstract.

automatically detecting dependencies among a set of objects, wherein each of said objects in said set includes at least one linkable file;

George is considered to provide for automatically detecting dependencies via col. 1 lines 57-col. 2 line 6 in which he specifies that the feature is performed by his invention (automatically) but may be overridden by user selection (manually).

adding said detected dependencies to a dependency list for said set of objects; and

Georges dependency tree is considered represent the dependency list, see col. 2 lines 7-17. See also George's table in col. 8 lines 24-37, which is also considered a list.

removing dependencies from said dependency list for any object that does not also have at least one file dependency.

The feature is not specifically listed in George's reference; however, it is considered inherent in George's teachings of deleting child objects when their respective parent objects are Deleted (col. 9 lines 19-34). Although this is considered inherent via the teachings specified above, assuming that it is not, the feature of removing dependencies from a dependency list is specifically taught by Wallman to conserve memory, see col. 1 lines 35-46 and col. 1 line 66-col. 2 line 8. Therefore, it would have been obvious to a person having ordinary skill in the art at the time of the invention to utilize the feature taught by Wallman in George's system for the same reasons they are utilized in Wallman's system to enable memory that is no longer referenced to be reused, see Wallman's summary of the invention.

2. A method for optimizing dependencies as recited in claim 1 further comprising removing unused files from said set of objects.

See George's col. 7 lines 6-22. The files to be deleted are the records (files) in the cited portion.

In reference to claims 8, 18 and 20, unclear features are not entitled patentable weight and therefore each of the claims are rejected as their respective parent claims (claims 1, 11 and 1) are. Furthermore, see the user overriding and customizable features (manually detecting and editing) in George's col. 1 line 65-col. 2 line 6.

As per claims 9, 11 and 19, see the rejection of claim 1 above.

The features of claim 10 is taught via the user overrides or customizable features (manually editing) cited via George's col. 1 lines 65-col. 2 lines 6.

In reference to claim 12, see the rejection of claim 2 above.

Allowable Subject Matter

11. Claims 3-7, 13-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Chavis whose telephone number is (571) 272-3720. The examiner can normally be reached on M-F, 9:00am-5:30pm, EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2193

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
